

“ Our vision:
to provide trusted multilingual communication ”

eLEARNING

TURNKEY SOLUTIONS FOR eLEARNING AND TRAINING

eLearning has emerged as a critical tool for organizations that need to train an increasingly diverse and dispersed workforce. It's cost-effective and enables trainers to take advantage of flexible content and formats. Whether your organization needs to train employees, customers or prospects, you'll have more success when you make it easy for your audience to engage with you. That means providing courses and material everyone can access at their convenience—in their language and in context of their culture.

Our eLearning expertise is the result of our in-house skills in other areas: cultural adaptation and analysis, translation, localization, engineering, audio recording, multimedia production, desktop publishing, quality assurance and project management. Combined, these services allow us to tailor comprehensive eLearning solutions for our clients.

CULTURAL ADAPTATION

Translating your training materials is just one step in our eLearning process. To ensure your eLearning initiative is successful, we also offer cultural adaptation services.

Since most eLearning courses are designed in Western cultures, they don't necessarily reflect the differences in educational systems, cultural values and learning preferences prevalent in other target audiences. We can consult with you on eLearning courseware, website content, audio scripts, presentations and other training and development materials to ensure they align with your audience's cultural needs.

SERVICES

- › In-House Audio Recording
